

SIRIUS P5

- The first to offer different interchangeable cases for users to switch them up for style variation, without needing to purchase a new set of earbuds
- Built with the latest Qualcomm 3046 chip and featuring Bluetooth 5.2 for fast and stable connection
- The 12mm drivers and Qualcomm aptX high definition are able to deliver powerful bass and clear, industry-leading sound quality
- 40 hours of total playtime. 8 hours for a single charge and charging case holds 4 extra charges
- 4 RGB lights on the left side of Sirius P5 can be customized with changing colors for additional personalization.
- Smart touch controls on the earbuds make them easy to use.
- Lightweight makes it comfortable to wear. ENC for crystal clear calls.
- 2 sound modes - concert acoustics in Music Mode and 48 low latency in Gaming mode.
- An IPX4 water-resistant rating makes Sirius P5 ideal for outdoor.
- The included necklace can be attached to the earbuds to ensure they are never lost in any activity.

"With retro-futuristic designs, Sirius P5 earbuds are straight out of a sci-fi film!"

WHAT HI-FI?

"what interests me most in this instance is those interchangeable cases – and not just because I like the look of them."

techradar.

"These days, wireless earbuds have become a bit of a commodity, so it's nice to see a company like GravaStar trying to find new ways to make these devices a little more interesting."

About GravaStar

GravaStar was founded in 2018 by legendary designer, Yong. The team at GravaStar is composed of talented engineers, designers, crafters, gamers, music fans and cartoonists, all aligned in their vision to create the next frontier of sound.

GravaStar don't just make audio devices, they are creating audio engineering art.

The care and attention the team put into the small design details of each model is a symbol of the team's passion. Their products are collectible display pieces as well as powerful, functional audio devices.
